Sub: - **Starting of Airfiber service in the urban areas by BSNL's team – req.**

Sir,

We wish to bring the following to your kind notice regarding the provisioning of Airfiber service in the urban areas.

Presently, there is no Airfiber service being provided by BSNL team. Airfiber service is only being provided by the Franchisees / TIPs in the rural areas in some places. However, there is requirement for Airfiber service in the urban areas also, where optical fiber cable is not available.

Provisioning of FTTH connections through overhead cables is difficult to maintain. Also, through Airfiber, we can extend connectivity to BTS locations, in case of OFC cut / failure. Airfiber service will be very useful in cases where restoration of the cable fault takes a long time.

Airfiber service will prove to be very useful in cases of VVIP visits, elections, provisioning of leased lines and also in times of natural calamities. Airfiber services can be deployed within a short time, if there is availability of hardware and trained BSNL staff. Airfiber provides Long-Distance Coverage, which is reliable and stable and cost effective. This service is efficient since it is having Low Latency.

In view of the foregoing, we request the BSNL Management to kindly take necessary action for the provisioning of Airfiber service in the urban areas, by BSNL's own team.

Thanking you,

Yours sincerely

[P. Abhimanyu]
General Secretary
